Since our foundation in 1984, in the pursuit of our mission of “manufacturing nutritional supplements from natural sources that are beneficial for health”, our company has been dedicated to the search for bioactive substances and the development of functional foods that are supported by scientific evidences. We acquired certifications on “ISO 9001”, “ISO 22000” and “GMP for dietary supplement” to provide safe, stable and high quality products.

We work with around 5,000 sales representatives in Japan and abroad who are trained and committed to communicating the benefits of our products to consumers. In particular, “AHCC”, our main product, is exported to more than 10 countries worldwide and used as a therapeutic adjunct for patients in many hospitals.

**Major Product Lines**: mushroom-derived product (AHCC), Lychee-derived low molecular weight polyphenol (Oligonol), soy bean derived product (GCP), perilla extract, buckwheat polyphenol (PMP), and plant growth regulator (Super Amino Up)
