Eniwa Research Business Park Co., Ltd.

Corporate Profile

Eniwa Research Business Park Co., Ltd. is designated as a “core facility for research, development and commercialization (Research Core)” under the Private Participation Promotion Act and established as a core of industrial support of the “Eniwa High Complex City Concept,” based on the research core concept in Hokkaido. We conduct a variety of business projects, with the head office in the Eniwa RB park center building that is located in the middle of flower town, Meguminono. Currently, a variety of businesses including R&D-based companies have their offices in this building.

For biotechnology start-up companies, we provide an environment that allows them to concentrate and work efficiently, making our open lab facilities and R&D-related equipment and instruments in the building available for effective use, and for individuals and companies that promote research and development toward corporatization of various businesses that respond to an aging society, we provide support as a coordinator and help them with such things as applying for grants.

In addition, as a cross-industrial association secretariat in the city of Eniwa, we aim to match these R&D-style companies with manufacturers, farmers and consumers in the surrounding area, and conduct activities to unearth business opportunities and create new products and new businesses.

Additionally, we are entrusted with the electronic processing operations of the local Eniwa city office, designated managers’ operations and water supply services of public institutions to contribute to the reduction in administrative costs and consequently local revitalization.

Aiming for collecting operation and research institutions, Eniwa Research Business Park Co., Ltd. will form networks for fostering new local industries in the future by establishing relationships among industrial, academic and government organs, utilizing the advantages of the Center Building and Eniwa’s regional as an R&D base.
