Beyond the boundaries of makers, we offer a one-stop shop for advertising and selling health foods, cosmetics and their raw materials produced in Hokkaido.

We can provide buyers and manufacturing and planning representatives with information that can be obtained because we reside in Hokkaido. We can also provide them with the information obtained from evaluating the qualities of various products and suggestions on the products all at once. This can be done because we are just transit traders. We provide suggestions by comparing differences in prices and characteristics among companies within Hokkaido, corporations in Honshu and overseas raw materials. Please make use of us as your company’s representative stationed in Hokkaido.

1) B-to-C mail-order sales of health foods and cosmetics produced in Hokkaido on the web site (Pirka Shop)
2) Wholesale services for retailers (As a consolidated shipment of items from different makers from our stock is possible, small shops can order even a minimum lot without worry)
3) Raw material supply, OEM and other consultation services
