Life Science Division of Sigma-Aldrich Japan K.K. (formerly SIGMA Genosys Japan K.K.) was founded as a base entity for the swift supply of high-quality custom synthesis oligo DNA, RNA, peptide and variety of reagents for research in life science and molecular biology by Japanese and other Asian researchers. In particular, chemical synthesis production equipment and software, using our proprietary technology, can achieve high-volume production with a high quality and low costs which are as competitive as other companies. Sigma-Aldrich factories in the U.S.A, Canada, the U.K., Germany, France, Israel, India, Australia, Singapore and Japan supply our products all over the world.

To ensure customer-oriented products and services, our company maintains high standards of quality standards by introducing thorough product management and an original manufacturing system. We obtained an ISO 9001:2008 certification. We have developed a reliable system for order processing, manufacturing and shipping, and provide user-friendly services to promote improvements in service in a proactive manner based on requests from customers.

Corporate Overview
Address: 777-13, Shinko-nishi 1-chome, Ishikari, Hokkaido 0613241 Japan
Company Representative: Akemi Matsui, production manager
Phone: +81-133-73-1211 FAX: +81-133-73-5035
URL: http://www.genosys.jp
Foundation: March, 1997
Employees: 72
Category of Business: Manufacturing and sales of chemicals
Contact: Akemi Matsui, production manager
E-mail: genosysjp@sial.com
