Corporate Profile

With a corporate ethos “To be the company which is indispensable to society by making products that can contribute to human health and local community through ‘food’”, Three-B CO., Ltd. succeeded in the artificial cultivation of “Tamogitake” by utilizing innovative biotechnology to provide highly functional products. We have a system, including cultivation, processing, shipping, and production, with an always balanced quality.

Since our establishment 20 years ago, we have delivered “boiled Tamogitake” to Hokkaido and 25 prefectures’ “School Lunch Association” who have given us a high appraisal from the general public as a proof of “trustful eating habit”, and we received a prize from the Minister of Agriculture, Forestry and Fisheries. In addition, our successful development of health food and cosmetics by extraction from Tamogitake and glucosylceramide with our proprietary technology has led to many inquiries from interested parties.

A patent application for our collaborative research with Hokkaido University and Sapporo Medical University are now underway. With a view to the production of materials for new functional foods, cosmetics and pharmaceuticals, we are looking for the best business partners.

Major Product Lines: Tamogitake, Boiled Tamogitake, Biogod, and Biogod Gold (provided to Ohta’s Isan Co., Ltd as OEM products), Elmcera · ceramide capsule, and Elmcera moist skin gel.
