We develop an only one technique and the number one technique based on original research and development, and are the R&D-oriented company for the purpose of contributing to human being and society through the pursuit health and environment. We have succeeded in achieving growth thanks to the firm support of academia and government through proven collaborative researches. We have been engaged in R&D, manufacture and distribution of high value-added products using natural materials.

In the field of functional foods containing nucleic acid, we hold more than 70% of product share as raw materials of nucleic acid in Japan. We commercialize meshimakobu MY 3 which is cultivated mycelium in fermentation tank of *Inonotus linteus* isolated in Japan, Benikusunokake AC 7 which is red mushroom *Antrodia cinnamomea* from Taiwan and has immunostimulating activity, and plant-derived lactic acid bacteria, Aspara-nomoto (cladophyll of *Asparagus officinalis*), etc, which are developed as the main purpose of utilizing the nature materials in Hokkaido.

We also have dedicated to research innovative materials and develop new functional foods, and have developed functional cosmetics and hair care preparations using the three-dimensional human skin model developed originally.

**Major Product Lines**: Nucleic acid (DNA and RNA) ; meshimakobu MY 3 and benikusunokake AC 7 ; and oligo DNA for functional cosmetics and care preparations

---

**Corporate Overview**

Address : 1–13, Megumino Kita 3-chome, Eniwa, Hokkaido 0611374 Japan  
Company Representative : Masaji Matsumaga, president  
Phone : +81–123–37–5533  
FAX : +81–123–36–0005  
URL : http://www.nisseibio.co.jp  
Foundation : September, 1994  
Capital : 98,000,000 Yen  
Employees : 28  
Category of Business : Food manufacturer  
Business Overview : Production and sales of nucleoprotein extracted from salmon milt ; sales of *Inonotus linteus* mycelia culture and *Antrodia cinnamomea* and plant-derived lactic acid bacterium  
Contact : Masao Nishihara, general manager, Research & Development Dept.  
(TEL : +81–123–37–5533  
FAX : +81–123–36–0005)
